

Book Recommender

By **Juan Camilo Salazar** Garcia Tamayo Montes

The Quest for the Perfect Book

The abundance of available books and vague categorizations often makes finding an enjoyable read a truly time consuming and frustrating experience.

Empowering Readers: Intelligent Book Recommendations

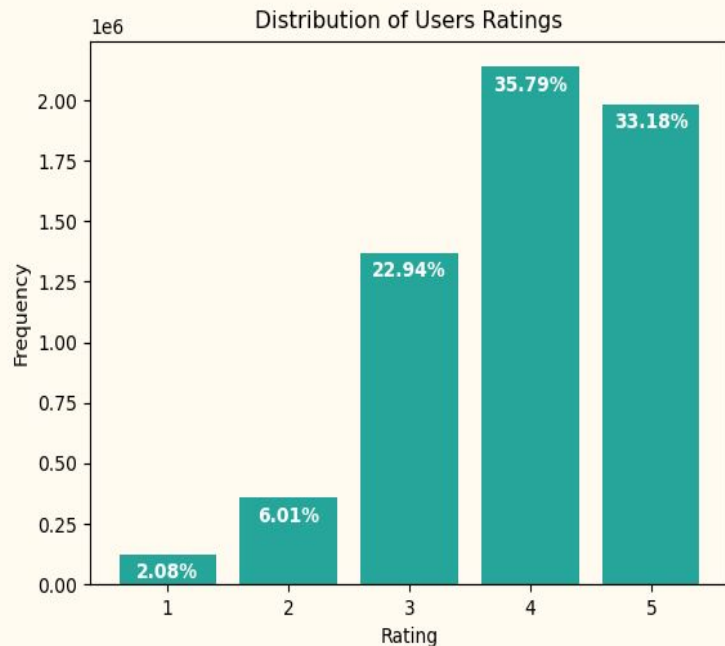

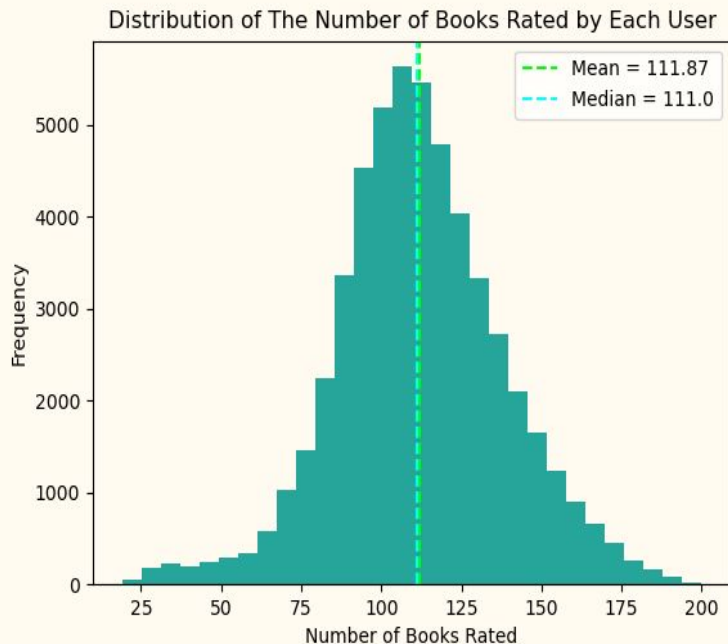

- Create recommendations tailored to individual reader interests and preferences so they can effortlessly find books
- Using collaborative filtering and content-based recommendation approaches.
- Utilize machine learning algorithms such as K-Nearest Neighbors (K-NN) and Funk SVD (Singular Value Decomposition)

Savings in Time And Boosting Reading Rate

- Reduce Searching Time
- Increased Reading Rate
- Enhanced Book Discovery
- Improved Customer Engagement
- Returning Users

The Data at Our Fingertips: GoodBooks-10K Dataset
